

# ROUND RECESSED

# D400

## DESCRIPTION

The Round Recessed Manhole Cover D400 is one of the benchmarks covers aimed at areas of heavy traffic, not requiring filling to meet the requirements of the class.

Made of spheroidal graphite cast iron (EN-GJS-500-7) according to EN 1563, this device is standardized for load class D400 (Group 4 of EN 124-2:2015). It is intended to be applied in passageways (including pedestrian streets), hard shoulders and parking areas for all types of road vehicles.

Frame with hydraulic seal to prevent the passage of odors.

The cover is provided with two handles for its lifting and is designed for filling with cobblestone or equivalent.

It also has black painting to protect against corrosion.
